

Lambeth Academy!

At Orchard Primary the year 6 class had a trip to Lambeth Academy. It was European languages day and at the school they had different stations teaching different languages, such as; Mandarin, French and Bengali. I was doing French and Mandarin. In Mandarin we learnt different numbers and how the symbols above them change the pronunciation. So if u has a curvy line you must stretch the sound of the last letter. In French we were learning different animals names like lion, elephant and monkey.

After this activity we went into a big hall surrounded by questions. We had a booklet which had answers and our objective was to find the questions that most suit those answers. We had a fake European Passport that had information on different countries which was meant to help us with the activity. In the background there was a song playing about supporting your countries. Some questions were simple whereas other took a lot of thinking. At the back of the European Passport there was a map and stickers. The map was empty and you had to fill in the countries with the stickers. We left around quarter past ten and got back at around 10:50.
